

The BookFunnel App for Kindle Fires and Android Devices

[Get the BookFunnel App - http://getbookfunnel.com/](http://getbookfunnel.com/)

The app is never required, but it sure makes it easier to download books wirelessly to your Kindle Fire and Android device!

The BookFunnel App:

Is not a reading app. It -

- Downloads books and sends them to the reader's preferred reading app
- Requires only 2 permissions (internet access and write access to save the book file)
- Has no ads and never will

Android users can get the BookFunnel app from the Google Play Store. Kindle Fire users can download it at <http://getbookfunnel.com/>.

Kindle Fire Readers

A reader who wants the book delivered wirelessly to their Kindle Fire is encouraged to download our app because it allows them to tap a button and BOOM, have the book.

The BookFunnel App for Kindle Fires will download your book and save it to your Books library on your Kindle Fire. Install the app on your Kindle Fire and then download any BookFunnel book you receive by either tapping the "Download Book with BookFunnel App" button on any book download page, or by entering the BookFunnel Code directly into the app.

The BookFunnel App for Android devices will download your book and send it to the reading app you select. Type the BookFunnel Code into the app and then tap the button to send the book to your preferred reading app (Kindle, Nook, etc.).

WHERE DO YOU GET THE BOOKFUNNEL CODE?

An author sent you a link to download their book, where you saw their book cover, and maybe even the book title and book description. Go back to that link and click "Get My Book", then click "I need the BookFunnel download code".

Android Readers

Android users are also offered the Bookfunnel app from the Google Play Store, depending on the reading app they select. Specifically, Kindle For Android Readers and Nook For Android readers see the BookFunnel app recommendation. Readers using any other reading app (like Kobo, Play Books, etc.) do not see the BookFunnel app recommendation because those apps will open a book stored anywhere on the device.

BOOKFUNNEL EBOOK VIA COMPUTER/USB CABLE TO KINDLE

If you've downloaded a free book from BookFunnel and want to get it onto your Kindle or Kobo reader, the easiest way is this:

Connect your Kindle to your computer via the USB charging cable, then drag and drop the file into the "documents" or "ebooks" folder on your device.

1. Click the "Get My Book" or "Download Now" button (underneath the book title/description) to download the file to your computer
2. Download the ebook file attachment from the email to your computer.
3. Connect the USB cable between the Kindle and your computer. When your computer recognizes the Kindle device, click on the Kindle. Its file folders will be revealed. Find the "documents" folder, or the "ebooks" folder if your device has one.
4. Drag and drop the ebook file into your Kindle's documents (or ebooks) folder.
5. Detach the cord and check your Kindle's home page. The title may take a moment to appear.

How to Download BookFunnel Link To Your iPad or iPhone To iBooks or Kindle app

Make sure the iBooks or Free Kindle app is on your iPad or iPhone.

Click the "Get My Free Book" or "Download Now" button (underneath the book title/description)

Select "Open in Safari" or click the small compass icon in the bottom corner of the screen

Select correct option for iBooks or Kindle app

It will take a few seconds then a new screen will load that says "Open in Kindle" or "Open in iBooks"

Select your preference

The eBook will open and be added to your iBooks or Kindle collection (whichever you selected above)

From now on, you can open the document from the iBooks or Kindle app on your iPad/iPhone.
